

St. Lawrence
College

Dream it. Then live it.

CONTRIBUTE TO A GREENER FUTURE AS AN ENVIRONMENTAL TECHNICIAN

ENVIRONMENTAL TECHNICIAN, ONTARIO COLLEGE DIPLOMA: 0964 CORNWALL

You won't find this kind of opportunity anywhere!

- You will learn from the research scientists of the St. Lawrence River Institute of Environmental Sciences—a world leader in environmental research—located on campus.
- Our campus is located right on the shores of a living laboratory, the St. Lawrence River... how great is that?
- You'll get to participate in laboratory and field work experiences. Great hands-on stuff!
- You'll get a work placement opportunity to get you started in your career!

The possibilities are endless...

You can choose to work as an environmental officer in the Ministry of the Environment, as a water/waste water treatment operator, or as a technician for a private industry. You can work in testing laboratories, conservation authorities, and consulting firms. Who knows where your knowledge and experience will bring you next?

Just can't get enough?

You may enjoy your program so much that you'll want to keep learning more. You can increase your level of education by completing a university degree in as little as two extra years after your graduation or complete the 3rd year of an environmental technology program.

Environmental Technician PLUS!

When you graduate, you'll receive an Ontario College Diploma as an Environmental Technician.

Plus... you will be eligible to receive the Entry Level Drinking Water Operator certificate from the Ministry of the Environment.

Plus... you'll be prepared to write the Entry Level Water Operator and Water Quality Analyst exams.
